

SPAMTITAN PLUGIN FOR OUTLOOK

INTRODUCTION: This guide will explain how to download and configure the SpamTitan plugin for Outlook

SYSTEM REQUIREMENTS: Microsoft Outlook

WHAT YOU MAY NEED & OTHER CONSIDERATIONS:

- You will need an active HES account (Hosted Email Security)

STEP ONE

Open the link below and download SpamTitanAssIn.msi

<https://helpdesk.spamtitan.com/support/solutions/articles/4000077154-installing-the-spamtitan-outlook-addin-3-0>

STEP TWO

Click Run once the file has been downloaded and complete the setup Wizard

STEP THREE

Open Outlook > File > Slow and Disabled COM Add-ins

If the SpamTitan Addin is disabled please enable it

STEP FOUR

Click Add-ins and under SpamTitan click options. You will need to configure the plugin using the below screenshot. NB the username and password is for SpamTitan, NOT Outlook

STOA Options

SPAM TITAN
OUTLOOK ADDIN V3

My SpamTitan

URL or IP address
hes01.it-logik.com

Port Number HTTP Timeout
80 OR 443 10

User Authentication

User Name
your email address

Password

Save

Other Settings

Send mail marked as spam to Junk E-mail folder

Show success and report notifications

www.spamtitan.com Exit

STEP FIVE

To use the Plugin, select an email and right click. You should see SpamTitan as an option in the dropdown.

Hover over the SpamTitan section and select the appropriate action (such as Blacklist, Whitelist, Mark as Spam)
